3.2 Game Selector

From the Game Selector screen player can select one of eight available games.

Games on the screen are divided into two sets, active games have colored logos and inactive games are grayed. To switch between sets, player has to press START button. To play a game from the active set, player has to press HOLD1 to HOLD5 buttons respectively or touch corresponding button with game logo on the screen. Any game can be disabled from the Game Setup Menu and will be not available for selection.

By pressing PAYOUT button, player can initiate payout of available credits.

NOTE: After exiting from the game to game selector, player has to wait for 2.5 seconds, until PAYOUT button becomes active; this is done to avoid accidental payouts.

4 Diamond Poker

4.1 Overview

Diamond Poker is a one deck (with joker), two draw video poker game with mini bonus feature. Player can select to bet 1 to 1000 credits per draw (maximum bet can be configured in Initial Setup). Credits are wagered per each draw.

Figure 2: Diamond Poker – Main Game Screen

4.2 Main Game

To adjust current bet player has to press BET button on the game panel to select desired bet. By pressing MAX BET button on the game panel maximum bet will be set.

After pressing START button five cards of the first deal will be shown on the screen. Player has to select card to be held by pressing HOLD1 to HOLD5 buttons (or by touching corresponding card on the touch screen). Machine will automatically propose card to be held. If current cards form winning combination, corresponding combination will be highlighted in the paytable. If player does not want to proceed to the second draw or wants to keep current winning, none of the cards should be held and START button should be pressed.

After selecting cards to be held, player has to press START button for the second draw to be dealt. Cards that form winning combination will be labeled with “WIN” sign. After transferring winning to the credits meter, cards that have paid will be labeled with “PAID” sign.

Mini bonus value is increased by the value of current bet when high pair is won. For each bet group separate mini bonus value is accumulated. Mini bonus can be won, when current mini bonus value reaches maximum, then game randomly selects whether to award player with the mini bonus. If mini bonus value plus current bet exceeds maximum value, then current bet is accumulated to the mini bonus “shadow”. After winning mini bonus, “shadow” part becomes starting value of the mini bonus.

Mini bonus bet groups

Bet	Maximum Value
1..9	100
10..29	300
30..99	1000
100..299	3000
300	10000
1000..2999	30000
3000+	100000

To activate autostart feature, player has to press AUTO button. When autostart feature is active, game is played automatically (card are held using auto-hold feature). To deactivate autostart, player has to press any button on the game panel. When game is played with autostart, machine does not enter gamble game and proceed to the next game.

Any winning in main game that does not exceed Gamble Bet Limit, can be doubled (if Gamble is enabled).

4.3 Paytable

Paytable shows possible winning combinations.

To return back to the game START button should be pressed.

Figure 3: Diamond Poker – Paytable

4.4 Gamble Game

Player has to guess which color will be the next dealers' card – red or black. If selected color and dealers' card color match, players' winning is doubled and player can continue to gamble or end the game. If player does not guess the color right, gamble game ends with no winning.

If winning in the gamble game exceeds Gamble Bet Limit, or number of sequential gamble games played exceeds Gamble Hit Limit, gamble game is ended automatically.

Player can collect winning by pressing START button.

To select RED color, player has to press BET button, BLACK color – MAX BET button.

Probability of winning or losing in the gamble game is 50%.
